

I am a listener of the FM translator station Air 1 and I recently heard this may force them off the air due to little value in the FM traslator stations. Well I am writing to say there is very much value in this station, hundreds of thousands of people listen to this station. It changes lives! I do not believe the station you would replace Air 1 with would have "more value"! Air 1 supported by its listeners to say on the air - that should say how valuable it is! It would be a great disappointment if you forced this station off the air.
